

CESAB O1

Redefining performance standards

Low level order picker trucks

O1

The new low level order pickers - O1 series from **CESAB** are ideal for fast-moving goods in warehouse operations. This new generation of trucks offers a powerful blend of efficiency, safety and operator comfort. This series redefines the performance standards. Whether it's for picking at first and second level, the models have been designed with ergonomics in mind. Engineered for low energy consumption, operational costs are minimised while delivering maximum power. Safety has been enhanced with various intelligent features keeping operators safe at all times.

Redefining performance standards

Experience a new concept of performance with the new low level order pickers from **CESAB**. The redesigned and improved driver compartment boosts picking efficiency. Featuring ergonomic, easy to reach controls, a perfectly positioned steering handle and improved foot space for comfort, reducing fatigue during long shifts and intense tasks. The O1 sleek design is paired with a durable, low weight chassis offering extra storage for tools and personal items, ideal for efficient warehouse operations. An easy-to-use lithium-ion charging system minimises downtime. Low energy consumption, low vibrations and a smooth ride enhance efficiency. Intelligent safety features like integrated LED lights, speed reduction when cornering, (part of OTP*) and improved visibility ensure a safe working environment.

SAFETY

ERGONOMICS

PERFORMANCE

DESIGN

Ergonomic driver compartment

Updated operator compartment, lower vibration levels, soft knee pad(s), lowered steering handle, easier step-in, larger operator space, adjustable lean support.

Higher productivity

Low energy consumption, walkie buttons, increased platform height (on platform models), easy access to smaller battery and battery compatibility between trucks.

Safety features

Integrated daytime running lights, blue/red LED warning light(s), speed reduction when cornering (OTP*), Pin code, handle in backrest for safe reversing.

New smart design

New compact design, new durable low-weight material, new battery hood opening, tilting, locking and multiple new storage areas.

* OTP: Optimised Truck Performance
